Additional Notes

This is an expedited unscheduled release to resolve a critical issue with search results not displaying terms for Managed Service and Training Authoring Platforms.

There is currently a known occasional issue relating to default language settings, but it has a quick workaround in the search panel - if a language error message appears instead of the search results, please select one of the options in the *Filter by* dropdown (for the Training Authoring Platform these will be *FSN in US* or *PT in ZZ*):

This will set a default language, and present the results to match. Once set, the last language choice used in the search is persisted on the server across user login sessions.

Module versions in this deployment

Module	Version	Deployment notes
Authoring-Services (API)	5.13.0	unchanged

Authoring-UI	4.2.1	new
Drools Rules	1.28.0	unchanged
