

2019/10/30 - Malaysia: SNOMED supporting clinicians

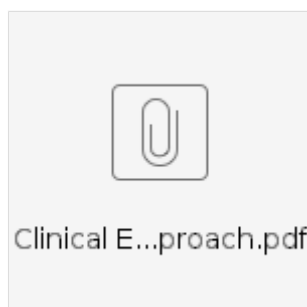

Clinical input into the development of SNOMED CT ensures that the terminology meets current and future clinical requirements. These activities form part of the broader approach of Clinical Engagement. The session aims to showcase the work currently underway within SNOMED International and the broader clinical SNOMED CT community. The aim is to share current practice and work in progress to support future developments that will provide SNOMED CT with the clinical input it requires supporting the global clinical community of practice.
